MEMBRANE SEPARATION PROCESS

REVERSE OSMOSIS

SWEET 4" RO SYSTEM

Result of many years of experience, the **Osmeo** range combines compactness, ease of use and high treatment performance.

Equipped with low energy 4" reverse osmosis membranes, the **Osmeo Sweet** RO systems are managed by an electronic controller which monitors the safety systems and the automatic filling of the permeate tank.

As an option, the Osmeo RO systems can be integrated on a stainless steel skid together with a pretreatment adapted to the raw water specifications (pre-filtration, softening, chemical conditioning, dechlorination...)

An independant Clean-In-Place (CIP) equipment can be proposed.
