

Osmeo Easy DF2

1500 to 2 400 L/h

MEMBRANE SEPARATION PROCESS

REVERSE OSMOSIS

EASY PLUS 4" RO SYSTEM

Result of many years of experience, the **Osmeo** range combines compactness, ease of use and high treatment performance.

Equipped with low energy 4" reverse osmosis membranes, the **Osmeo Sweet'** RO systems are managed by an electronic controller which monitors the safety systems and the automatic filling of the permeate tank.

As an option, the Osmeo RO systems can be integrated on a stainless steel skid together with a pretreatment adapted to the raw water specifications (pre-filtration, softening, chemical conditioning, dechlorination...)

An independant Clean-In-Place (CIP) equipment can be proposed.

APPLICATIONS

The Osmeo range is designed to supply reverse osmosis water for the following applications :

- low pressure boilers,
- professional laundries,
- laboratories, cosmetics,
- car wash,
- any application requiring RO water.

SPECIFICATIONS

- Inlet isolating valve
- Pressure gauge
- Activated carbon for chlorine removal
- 1µm cartridge filtration
- Adjustable low inlet pressure switch
- Vertical multistage pump
- Valve to adjust the service pressure with pressure gauge
- Fiberglass membrane housings
- Low energy 4" Membranes
- Conductivity probe.
- Scaled flow control valve for the recirculation of the concentrate
- Flush solenoid valve.
- Flowmeter on the permeate line.
- Flowmeter on the concentrate line
- Sampling on permeate.
- 3-way quality purge valve (optional)
- Osmeo Control Plus LCD control unit
